## FARINA HOLDING S.R.L.

The Farina Group of Companies

**Farina Holding Srl** was born in mid-September 2019 to optimize the organizational asset of the Farina group which, through its subsidiaries, Farina Service S.r.l., F.M.I. Srl and M.D.F. Motors S.r.l. has experienced a significant increase in working activity in recent years. The diversification of company skills led to the need for a coordination that could better identify the companies' "souls":

- **Farina Service S.r.l.**, founded in 1996 by the transformation of the historic family company, which deals with everything related to repairs and electromechanical assistance;
- **F.M.I. Farina Manutenzioni Industriali S.r.l.**, born in 2011 to provide any type of industrial and mechanical maintenance, carpentry and vulcanization;
- **M.D.F. Motors S.r.l.**, the most recent company of the group, established in 2018 to deal mainly with the sale of electric motors and electromechanical equipment.

Farina Holding aims to rationalize the financial, human and organizational resources already present in the same investee companies to provide consulting, assistance, training, research and development services. It deals with the provision of administrative, accounting, payroll, tax and financial services, and any activity related to its own business or that of the investee companies. The goal is, and remains, to continue to be a group aimed at being "glocal" (global thinking, local action), that means companies have to be both global and local, attentive to national development, but also to interaction with the local territory, at the center of which there has always been customer relationship.

<https://www.farinaholding.it/>

**Farina Service** specializes in various sectors of industrial activity, has many years of experience in the electrical, electromechanical, mechanical and electronic repair sector from which it has developed all the divisions that currently make up the Farina Group's industrial asset.

The company took its first steps in the 70s in Alfonsine (RA), when Farina Mario, owner of a car electrical repair workshop, decided to diversify the business by starting to carry out the first windings on small motors and pumps, for companies and private citizens.

Given the interest found, this choice became the main job. Over the years, his sons Luciano, Roberto and Fabrizio joined Mr. Farina, who gave birth in 1990 to Farina Elettromeccanica S.n.c. in conjunction with the transfer from the old workshop under the house, just a few square meters large, to the new one in via Stroppata, 78.

Successes were not long in coming, the technical responses and innovative solutions that the company was recommending to the customers, laid the foundations for further development.

After just 6 years Farina Service S.r.l. takes off, its mission "the total service" towards customers operating with supervision, also directly on the production facilities.

In January 2003 Farina Service inaugurated the new headquarters in via della Cooperazione, consisting of a modern factory with cutting-edge structural solutions.

The new reality has a covered area of over 2,500 square meters, and a surrounding uncovered area of 3,500 square meters. The large spaces dedicated to the warehouse and the reorganization of the

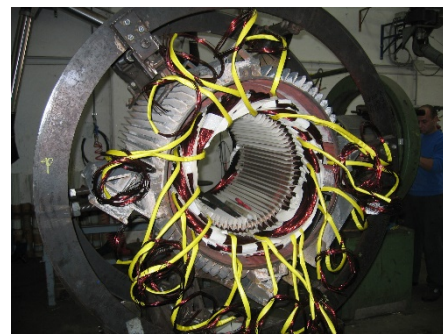

workshop give a further boost to the growth of the company. In 2011, from a branch of this, we see the start-up of F.M.I. Farina Manutenzioni Industriali S.r.l., specialized in maintenance and construction of industrial and civil installations, metal carpentry, building sites and vulcanization.

In December 2015, the office was expanded with the construction of the administrative and commercial offices with over 300 square meters of operating surface.

Respect and consideration of customer's needs, product quality, attention and care in the various processes are some of our main goals. But our particularity is being "glocal"

(thinking global, acting local), that means a company that is both global and local, attentive to national development, but also to its interaction with the territory. The customer has always been at the center of daily commitment. A relationship of trust made up of knowledge, experience, feeling and intuition; a mechanism of mutual and lasting loyalty is what binds Farina to its customers. A key element of the company's success and an indication of respect for the customer is also attention to safety, social and local communities in which it operates.

The many years of experience in the repair sector and the related know-how have and continue to contribute to the development of the Farina group. From the continuous pursuit of customer's total satisfaction, in 2018, in conjunction with the construction of the new warehouse, the MDF Motors S.r.l. commercial division was born. With the starting of this company we aim to continue and improve the distribution of electrical equipment, alternator motors, pumps etc. and all their equipment, counting on the wide availability of the new warehouse.

## Products and services

### Electrical equipment repair

Farina Service deals with the repair of machines and electrical equipment which, for example, we list below:

- Low and medium voltage electric motors
- DC motors
- Ring motors
- Brushless motors
- Vector engines
- Gear motors
- Servomotors
- Low and medium voltage alternators
- Low and medium voltage transformers
- Centrifugal, submersible, multistage pumps and electric pumps etc.
- Horizontal and vertical water pumps
- Generator sets and motor welders
- Inverter and electronic drives

In addition to this, the company offers the necessary support for all the services that make up the workshop and customer support activities.

### Windings

We carry out internal windings of:

- Stators and rotors for AC and DC motors, both in wire and flat
- Coils for transformers, electro-brakes, electro-switches and remote-control switches (both STD and dedicated)

### External interventions

By means of specialized personnel, we carry out routine checks and maintenance of AC and DC machines as well as vibrometric checks and alignments with laser instruments.

### Third party works

To complete the already wide application framework we create dynamic and static balances of rotors, impellers D. max 2000 P. max 3500., metal spray coatings and the construction of custom engines.

### Collection and delivery

Collection and delivery with our vehicles.

### Authorized technical assistance:

# F.M.I. FARINA MANUTENZIONI INDUSTRIALI S.R.L.

Who we are

**FARINA MANUTENZIONI INDUSTRIALI**

**Farina Manutenzioni Industriali** is a company certified ISO 9001 – ISO 45001 and qualified according to UNI EN 1090.

The company is located in Alfonsine (RA), in Via della Cooperazione 1, near the State Road 16 “Adriatica” that connects Ravenna with Ferrara, where the carpentry and construction workshop is located.

FMI S.r.l. is a company of Luciano and Roberto Farina, founded in 2011 to support Farina Service Srl, an electromechanical company, which was founded in 1996.

The group has developed over the years, diversifying its activities and increasing its production.

From November 2016, in the “Bassette”, industrial area of Ravenna, Via B. Buozzi n. 46, a branch has been opened that acts as an operating center for building and maintenance sites activities and that occupies a 800 square meters area.

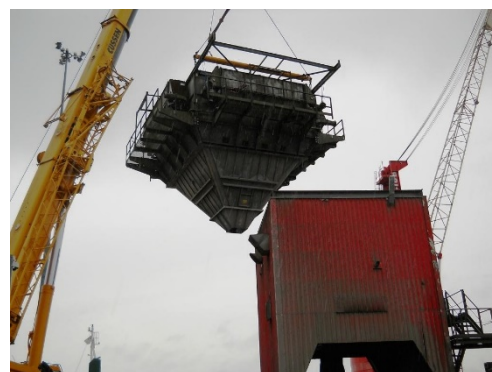

The activity is divided into several sectors: mechanics, construction of industrial and civil plants, the chemical, agri-food and bioenergetic sector.

The company is also specialized in the repair and vulcanization of conveyor belts, by means of internal technicians with top-level know-how.

With a view to the conversion of the group’s activities, at the workshop in Via Stroppata n. 78, one of the historical sites, mechanical repairs of metal boxes and preparation of joints of conveyor belts and rubber rollers are carried out.

The multi-specialist F.M.I. staff is the strong point, which allows a high level of versatility and competitiveness.

Each sector is coordinated by specialized technicians, always ready to respond to the different needs of customers with maintenance sites activities in the industrial sector, both with permanent and temporary construction sites.

<https://www.farinaholding.it/fmi/>

## Services

**F.M.I. S.r.l.** it mainly operates in the industrial sector, such as, for example, purification plants, incinerators and petrochemicals.

The beating heart of the company are the installations, maintenance and repairs of machinery in the electromechanical sector. More precisely, everything related to electric motors and pumps of various types, vibrating masses, conveyor belts, ship loading and unloading systems, composting systems.

F.M.I. performs maintenance of waste management plants; coke, activated carbon, fertilizers and packaging processing plants. It also provides assistance for lifting systems for wasted water and depuration.

The construction and maintenance site activity involves the creation of carbon-steel and stainless-steel piping for waste-to-energy plants (WTE), water purification, thermal power plants and for thermo-water sanitary systems (industrial / civil / large complexes).

The mechanical maintenance of the machinery completes the processes listed above on pumps, augers, compressors, alternators, conveyor belts, reducers, redlers, etc.

The carpentry workshop operating in the group is complementary to the construction and maintenance site activities and is able to perform different types of machining in carbon steel and AISI 304 – AISI 316 stainless steel.

Light, medium and heavy carpentry such as stairs, walkways, railings, pipe racks, mezzanines, tanks, sluice gates, structures for civil and industrial buildings, represent the daily standard of our processes.

For the completion and performance of the activities mentioned above, our company is in a position to design any type of structural metal structural work. Therefore, if requested, we are able to produce the related calculation reports, prepared by a qualified professional and accompanied by executive workshop drawings.

M.D.F. MOTORS S.R.L.

Who we are

**M.D.F. Motors S.r.l.**, Master Distributor Marelli Motori, was born from the spin-off of the business branch of electromechanical equipment business of Farina Service S.r.l..

Next to the historic Farina headquarters, in September 2018, the brand new M.D.F. Motors warehouse was completed which hosts, in via della Cooperation 16, the commercial offices with the related warehouse.

M.D.F. Motors has as its objective total customer satisfaction, providing an increasingly complete and professional service aimed, above all, at the distribution of industrial electric motors, both standard and ATEX.

In addition to these we deal with inverters, self-priming pumps, centrifugal pumps, circulators, reducers and all spare parts.

The strength of the commercial sector is the professionalism of the staff, which allows the search and the development of the most reliable and convenient solutions; the drafting of quotes, after-sales assistance and anything else necessary to meet customer requests.

Another qualifying note is the availability, in the warehouse, of the distributed material which is also delivered with its own means, thus allowing a prompt response to the various customer needs. The warehouse is in fact equipped with over 10,000 engines, all ready for delivery, up to 355 kw and of various types to meet all market demands.

<https://www.farinaholding.it/mdf-motors/>

## Products

**M.D.F. Motors is Master Distributor Marelli Motori** and in general deals with the sale of the following products:

### Engines:

IE3 three-phase motors Made in Italy;  
Imported IE3 three-phase motors;  
ATEX three-phase motors for gas, dust and combined areas;  
Double polarity three-phase motors;  
Off-Shore three-phase motors;  
Medium voltage, Atex and non-Atex three-phase motors;  
Water-cooled three-phase motors (Water Jacket);

### Alternators:

Low and medium voltage industrial;  
Off-Shore Industrial;  
For the hydroelectric sector;

### Farina Motors Distribution:

Imported three-phase motors IE1, IE2, IE3;  
Double polarity three-phase motors;  
Customized three-phase motors also on customer specifications;  
Servoventilated three-phase motors for inverter use with or without encoder;  
Self-braking three-phase motors, also for inverter use, servo-ventilated with or without encoder;  
Single-phase motors, including self-braking;  
DC motors;  
Brushless, synchronous motors;  
Vector induction motors;  
Torque motors;  
Drives and automations;

We also deal with gearboxes, electric pumps, spare parts, inverters, fans, vibrators and generators.

Electric pumps

Motor pumps

Industrial Electric Generators

Generator Sets

Inverter

Atex Asynchronous Electric Motors

Three-phase asynchronous electric motors

Single Phase Electric Motors

Mechanical Vibrators

Mechanical Parts

Reducers

Mechanical Fan
